

ATTACK ROCKETS

11

	Light	Medium	Heavy	Magnum	Ultra
Diameter	75mm	100mm	125mm	150mm	200mm
Rate of fire	S	S	S	S	S
Attack factor	*	*	*	*	*
Effect area	3	4	5	6	8
Detection effect	+1	+1	+1	+1	+1

* Dependent upon type of warhead used: hammerhead [7], high explosive [6].

	Short range	Medium range	Long range	Extended range
Cost	12	14	16	18

Flat trajectory - Direct fire

	Short range	Medium range	Long range
Short range rocket	16	32	48
Medium range rocket	24	48	72
Long range rocket	32	64	96
Extended range rocket	40	80	120

Attack rockets are surface-to-surface rockets commonly fielded on armored vehicles and strongpoints.

The maximum rate of fire for attack rockets is two rockets per mount (pod or rack). However, the rockets are fired individually so they are considered to be single shot weapons.

Attack rockets are unguided weapons for hit/miss determination purposes. They are not smart weapons.

Attack rockets are flat trajectory, direct fire weapons.
