

STRIKE ROCKETS

12

	Light	Medium	Heavy	Magnum	Ultra
Diameter	75mm	100mm	125mm	150mm	200mm
Rate of fire	S	S	S	S	S
Attack factor	*	*	*	*	*
Effect area	3	4	5	6	8
Detection effect	+1	+1	+1	+1	+1

* Dependent upon type of warhead used: hammerhead [7], high explosive [6].

	Short range	Medium range	Long range	Extended range
Cost	12	14	16	18

Flat trajectory - Direct fire

	Short range	Medium range	Long range
Short range rocket	16	32	48
Medium range rocket	24	48	72
Long range rocket	36	72	108
Extended range rocket	48	96	144

Strike rockets are air-to-air, air-to-surface, surface-to-air and surface-to-surface rockets generally utilized by aircraft. They are sometimes mounted on vehicles.

The maximum rate of fire for strike rockets is two rockets per rack. However, the rockets are fired individually so they are considered to be single shot weapons.

Strike rockets are unguided weapons for hit/miss determination purposes. They are not smart weapons.

Strike rockets are flat trajectory weapons.
